*Legendary Beef. Legendary Quality.*

## PREMIUM VARIETY MEATS BY HARRIS RANCH

Harris Ranch is proud of our track record of producing safe, wholesome and humanely produced beef products. Our frozen variety meats are no exception. Harris Ranch variety meats are produced from local, California grown grain fed steers and heifers. We offer a full line of 17 different high quality variety meats that are case-ready and vacuum sealed in random weight institutional pack sizes. At Harris Ranch, quality, consistency and the utmost dedication to food safety make our variety meats superior to other processor programs and offer chefs exceptional quality for on-trend and traditional recipe preparation.

At Harris Ranch, our beef cattle spend approximately 70 – 80% of the time grazing on grass on western ranches before being fed and finished at Harris Feeding Company for about 120 days. The nutritionally balanced diet of corn and other feed grains, plus alfalfa hay, vitamins and minerals helps add quality to all of our beef products. Our variety meats are no exception.

- *Grass raised and grain finished for superior flavor and quality*
- *Verified humane handling*
- *California grown by ranching families committed to animal welfare*
