

January 3, 2023

Dear Valued Customer:

Harris Ranch Beef Company (HRBC) is dedicated to producing the safest and most wholesome beef products for our customers; a commitment that is shared across all production phases at Harris Ranch. HRBC, on occasion, processes cattle that are greater than 30 months of age.

Harris Ranch Beef Company's unique product code identification system is designed to identify those products that are produced from carcasses of different age classes (i.e. greater than or less than 30 months). Accordingly, HRBC processes carcasses from each age class during designated production sets to prevent the comingling of product from different age classes. Subsequently, all product codes ending in 5, 6, 7, 8 or 9 meet the requirements for less than 30 months. The product code is displayed on the individual case or bin label, as well as the invoice. Please see the attached example invoice for product identification and nomenclature.

Please do not hesitate to contact me if you have any questions.

Sincerely,

Emily Krage
Food Safety Manager
